

# Umbrella Inserts and Stubby Screens

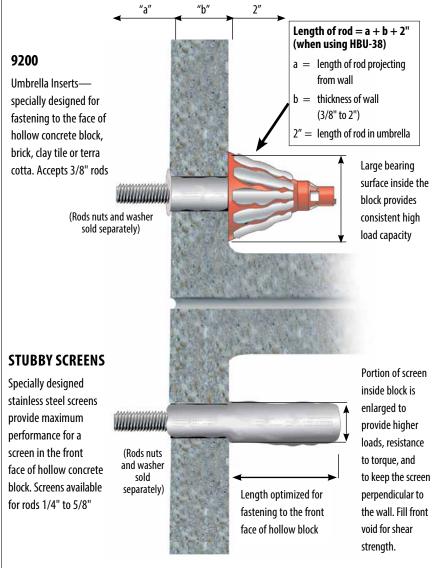

High Performance Adhesive Systems for Fastening to Hollow Base Materials

9200

## **DESCRIPTION/ADVANTAGES**

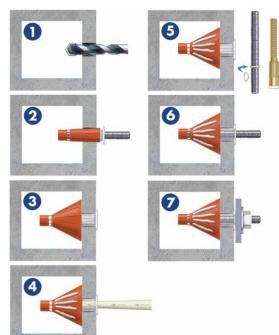

# Hollow Block Fastening with A7+ Adhesive

Section View—Concrete Block

- Drill 3/4" diameter hole, 3-3/4" deep using rotation only drilling mode and carbide tipped drill bit. Clean
  out hole with forced air. Complete hole preparation with use of a brush and repeat cleaning with
  compressed air (leave no dust or slurry).
- 2. Place umbrella on piece of threaded rod, stretch umbrella over the rod by pulling the white collar back approximately 1". Squeeze orange portion of umbrella and push umbrella into hole.
- 3. Push umbrella body through the hole and completely into void. Remove threaded rod. (Do not use in solid base materials. For anchoring into block web, ends and mortar joints, use screens.) View and verify umbrella wings expanded behind wall.
- **4.** Dispense and discard a sufficient amount of adhesive from new cartridge until a uniform adhesive mix is achieved. Inject approximately 1-1/2 fl. oz. of adhesive into umbrella (7 to 8 pumps using manual dispenser) to completely fill umbrella.
- **5.** 3/8" rod uses a centering ring (supplied with inserts) to keep rod perpendicular to the wall.
- Insert rod into the filled umbrella using a slow, soft twisting motion until it contacts the back of umbrella.
- **7.** Wait for appropriate temperature/cure time before tightening fixture to the recommended torque of 10 ft./lbs.

## INSTALLATION

### **SELECTION CHART**

Umbrella Inserts							
DESCRIPTI	ON	PART NO.	BOX CONTENTS				
Umbrella Anchor		9200	20 Umbrellas 20 Centering Rings				

### **ESTIMATING TABLE**

Umbrella Using Threaded Rod and Umbrella Inserts with A7+ Inserts Adhesives in Hollow Base Material

ROD In (mm)	DRILL HOLE DIA. INCHES	VOLUME OF CARTRIDGE	UMBRELLA INSERT WITH EMBEDMENT OF 3-3/4"
3/8 (9.5)	3/4	A7+ 10 fluid oz.	6
		A7+ 28 fluid oz.	17

1 Allowable working loads should not exceed 25% ultimate capacity. Based upon testing using ASTM A193, Grade B7 rod.

2 The tabulated values are for anchors installed at a minimum 12 inch edge distance and minimum 8 inch spacing.
